

FlashCards

A Mobile App
Design Project

by Radim Valach
designed in Figma

What is FlashCards?

FlashCards is an app that allows the user to create, organize and practice studying cards, or so called “flash cards”.

Users can create card sets, which they can later practice. If they activate a set, it will be shown on their home screen.

New Set

Save to Your Folders

When creating a new set, the user has to save it to at least one folder.

Save to New Folders

The user can create new folders on this screen.

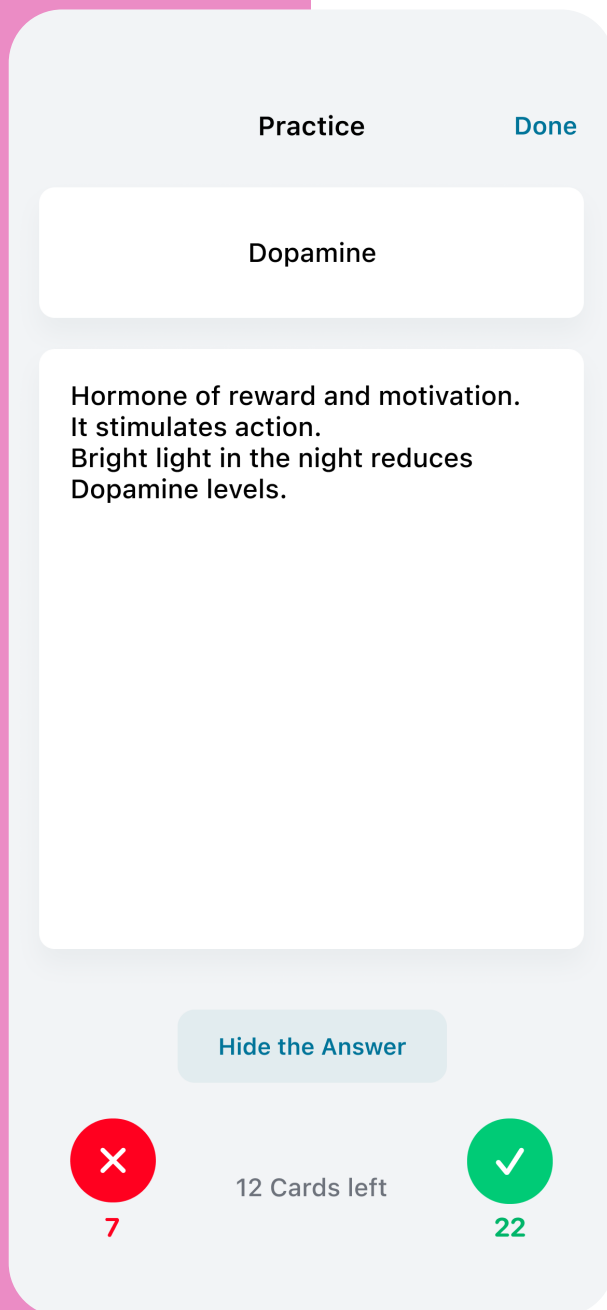

Card Set

Set Menu

From this menu, the user can begin practice, reset the counter of learned cards and activate the set,

Cards

The user can view all the cards belonging to this set and edit them, as well as create new ones.

Practice

Practice Card

The card answer is hidden at first, so the user can try and answer the question themselves.

Practice Controls

The user can reveal the answer and decide, if they've learned it.
